Forthcoming issues

This publication will be released according to the timetable published on the APRA website.

Revisions

This publication will include revisions to previously published statistics if better source data becomes available or if compilation errors are uncovered.

APRA regularly analyses past revisions to identify potential improvements to the source data and statistical compilation techniques, in order to minimise he frequency and scale of any future revisions.

Rounding

Details on tables may not add up to totals due to rounding of figures.

■30 September 2024

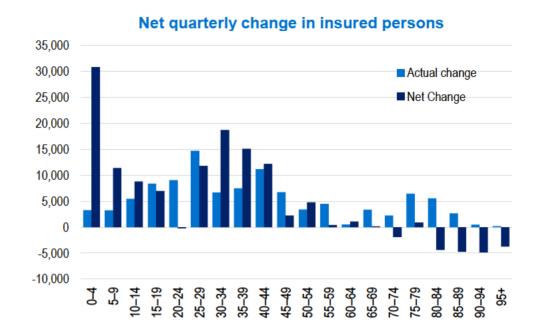

Hospital Treatment

At 30 September 2024, 12,341,521 people, or 45% of the population, were covered by hospital treatment cover. There was a slight increase compared to June 2024.

There was an increase in coverage of105,601 insured people in the September 2024 quarter compared to June 2024. Family policies increased by 14,578 and single policies by 25,325 during the quarter.

The largest increase in coverage during the quarter was 14,723 for people aged between 25 and 29. The largest net increase (taking into account movement between age groups) was for the 0-4 with an increase of 30,832 people.

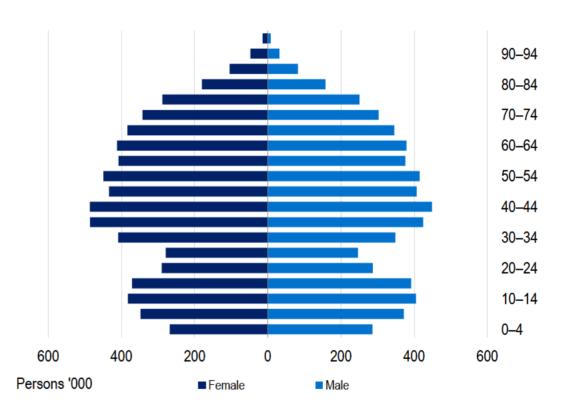

Lifetime health cover

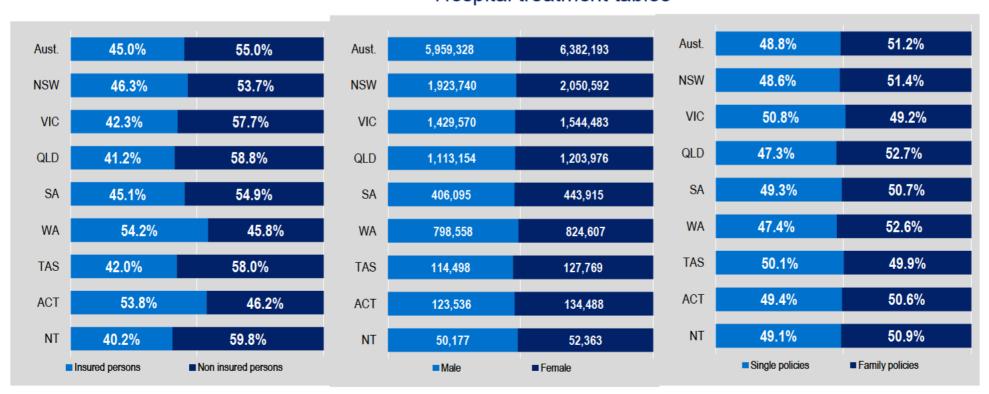

The majority of adults with hospital cover (87.9%) have a certified age of entry of 30, with no penalty loading.

At the end of the 30 September 2024 quarter, there were 1,069,622 people with a certified age of entry of more than 30 and subject to a Lifetime Health Cover loading; a net increase in people paying a penalty over the preceding 12 months of 81,718. There was a net increase in people with a certified age of entry of 30 (with no penalty) over the year of 120,268. Over the year, 116,493 people had their loading removed after paying a loading for ten years.

Number of persons insured by age

Hospital treatment tables

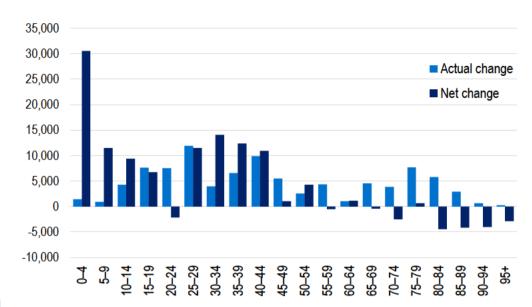

General Treatment

At 30 September 2024, 14,997,061 people or 54.7% of the population had some form of general treatment cover. There was an increase of 112,764 people when compared to the June quarter. There was an increase of General Treatment policies of 52,547 for September 2024 which was mainly driven by Single Policies which increased by 28,695. For the 12 months to 30 September 2024, the number of insured persons with general treatment cover has increased by 335,596.

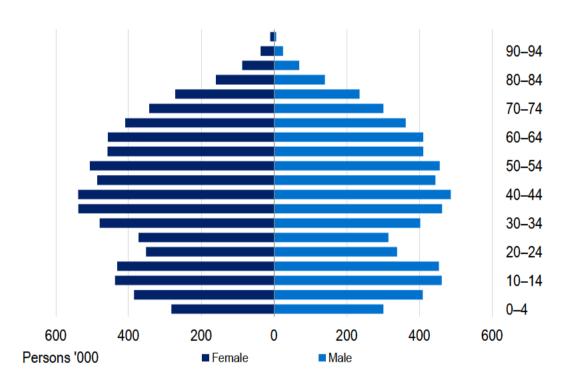

The general treatment (ancillary) by age charts and data in this report show data for those people that have general treatment policies covering ancillary services, regardless of other treatment included in the product. This excludes those general treatment policies that do not cover ancillary treatment.

There was an increase of 93,013 people with general treatment (ancillary) coverage in the September 2024 quarter. The largest net increase in coverage, after accounting for movements across age groups, was 30,499 for people in the 0 to 4 age group.

Benefits per episode/service

	September 2024	Change from June 2024	
Hospital Treatment			
Acute	\$2,647	-0.5%	
Medical	\$67	1.5%	
Prostheses	\$660	1.1%	
Cardiac	\$3,244	1.0%	
Hip	\$1,621	0.4%	
Knee	\$1,699	2.7%	
Total benefits and growth rate			
Hospital	\$4,822,279,641	0.1%	
General	\$1,589,242,269	-1.7%	

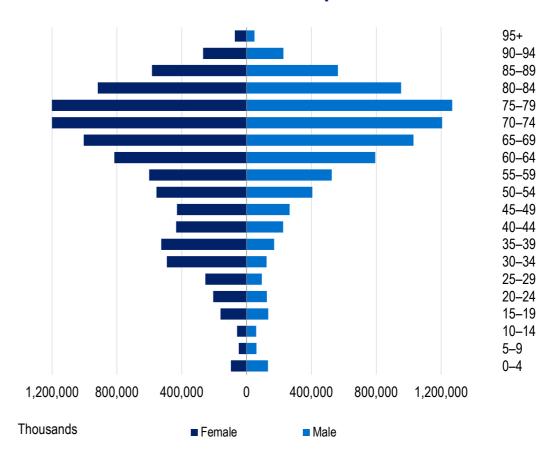

During the September 2024 quarter, insurers paid \$4,822 million in hospital treatment benefits, which was 0.05% higher compared to the June 2024 quarter. Hospital treatment benefits were comprised of:

- \Diamond \$3,483 million for hospital services such as accommodation and nursing
- ♦ \$719 million for medical services
- ♦ \$620 million for medical devices or human tissue items.

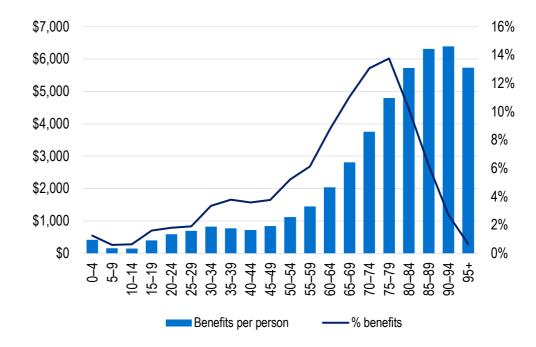

The age group for which most hospital benefits are paid is between 75 and 79 (top chart). Total benefits by age group is affected by the average benefits paid per person (displayed in the second chart) and the number of people in each age group.

Average hospital benefits per person increased from \$1,422.20 for the year ending September 2023 to \$1,490.88 for the year ending September 2024. The largest amount of benefits per person was spent on hospital accommodation and medical, followed by medical services and then medical devices or human tissue benefits.

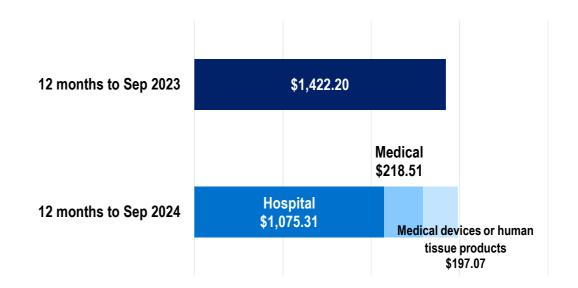

Hospital treatment benefits paid by age 12 months to 30 September 2024

Hospital treatment benefits per person covered and percentage of benefits paid by age cohort

Hospital treatment benefits per person

General treatment

Benefits per service

		Change from June 2024
September 2024		
Dental	\$67	0.7%
Chiropractic	\$34	-1.7%
Physiotherapy	\$40	-0.9%
Optical	\$82	0.5%

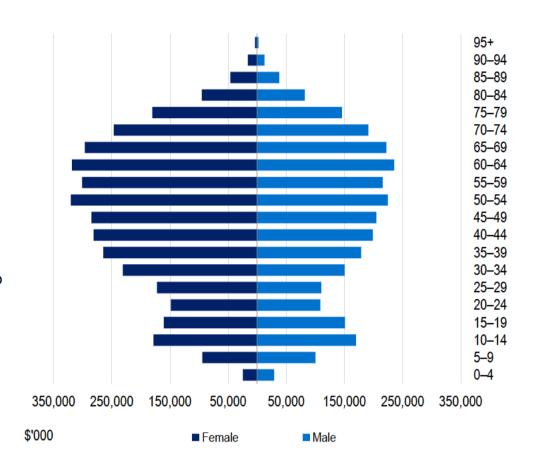

During the September 2024 quarter, insurers paid \$1,571.8 million in general treatment (ancillary) benefits. This was a decrease of 2.3% compared to the June 2024 quarter. Ancillary benefits for the September 2024 quarter included the major categories of:

- ♦ Dental \$894.3 million
- ♦ Optical \$212.3 million
- ♦ Physiotherapy \$123.8 million
- ♦ Chiropractic \$78.2 million.

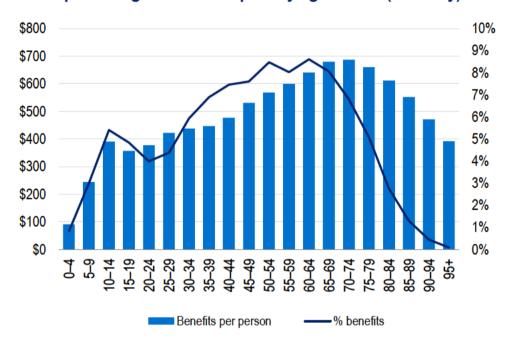

There is a marked difference between the distribution of benefits over age groups between hospital benefits and ancillary benefits. The major difference is the higher claiming rate in older age groups for hospital benefits while benefits per person for ancillary benefits are more evenly spread over the age groups.

General treatment (ancillary) benefits per person during the year to September 2023 were \$459.60. increasing to \$475.46 for the year to September 2024. The largest component of ancillary benefits is dental, for which \$262.00 was paid per insured.

Medical benefits

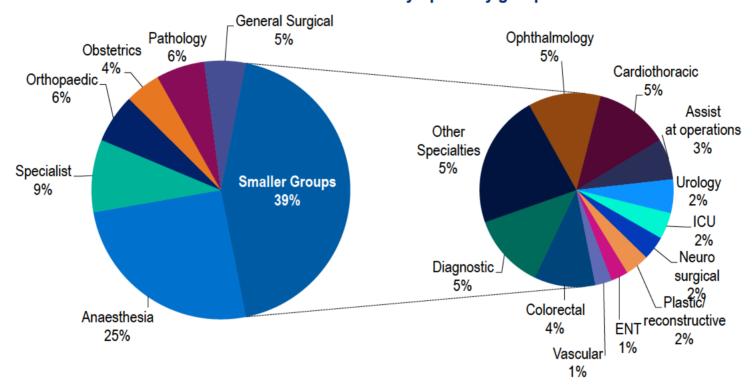

Total benefits for medical services increased by 5.2% during the September quarter 2024.

The change in medical benefits paid per service was calculated over a range of medical services and does not mean medical services overall decreased or increased in cost. The average benefits paid reflects the type of medical services utilised during the quarter as well as the volume of services. The medical service for which the greatest amount of benefits was paid was anaesthetics, comprising 25.3% of all medical benefits and totalling \$182.21 million.

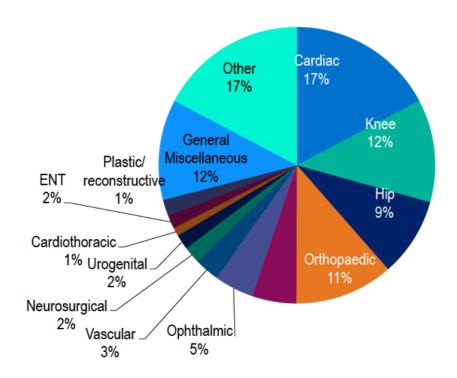

Medical devices or human tissue benefits

Total benefits paid for medical devices or human tissue products decreased by 3.3% in September 2024 compared to June 2024. Similar to medical services, the change in benefits paid for medical devices or human tissue products was calculated over a range of medical devices or human tissue products (see chart) and does not mean medical devices or human tissue products overall changed in cost. The change in benefits paid may reflect a change in the type of medical devices or human tissue products utilised, or a change in the overall utilisation of medical devices or human tissue products. The medical devices or human tissue products group for which the greatest amount of benefits were paid was cardiac, comprising 17.3% of all medical devices or human tissue products benefits and totalling \$107.25 million.

Service utilisation

Episodes/Services by type

	September 2024	Change from June 2024
Hospital Episodes Hospital Days Medical Services Prostheses Items Specialist Orthopaedic Ophthalmic Spinal General Treatment Dental Chiropractic	1,315,582 3,278,202 10,672,975 939,454 175,970 97,231 42,843 26,047,606 13,352,146 2,285,267	0.2% -1.2% 3.7% -4.4% -5.9% -17.7% -29.9% -1.9% -1.3% -3.5%
Physiotherapy Optical	3,067,522 2,575,719	-1.9% -6.6%

Hospital utilisation is distributed over four categories of hospital—public, private, day only facilities and hospital-substitute. During the September 2024 quarter, hospital episodes were distributed as follows:

- public hospitals 186,538 episodes
- ♦ private hospitals 893,558 episodes
- ♦ day hospital facilities 169,927 episodes
- ♦ hospital substitute 65,559 episodes.

For the September 2024 quarter, hospital utilisation (measured in episodes) increased by 0.2% which was mainly driven by hospitals-substitute.

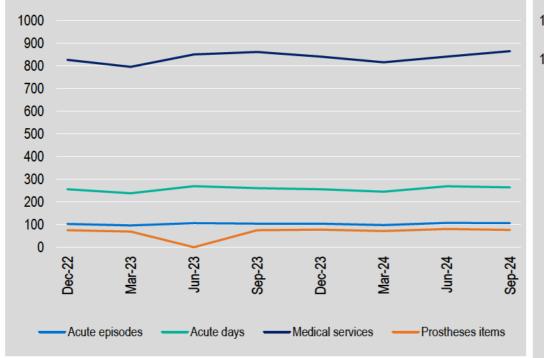

During the September 2024 quarter, insurers paid benefits for 3.3 million days in hospital, arising from 1.3 million hospital episodes of care.

			Quarter change	Yea	ar change
\Diamond	public hospitals	1	-2.1%	1	6.9%
\Diamond	private hospitals	Ť	1.1%	Ť	4.3%
\Diamond	day hospital facilities	1	-3.4%	1	1.4%
\Diamond	hospital-substitute	†	3.7%	<u>†</u>	4.0%

Day-only episodes in the four categories of hospital totalled 920,906 with a 1.1% change compared to June 2024.

Hospital treatment services per 1,000 insured persons

General treatment services (ancillary) per 1,000 insured person

Out-of-pocket payments

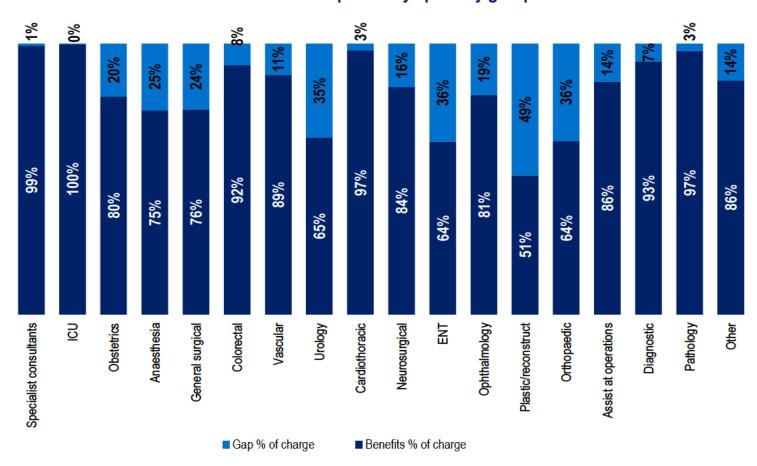

Average out-of-pocket per episode/service

	September 2024	Change from Jun 24	Change from Sep 23
Hospital treatment	\$432.14	-1.2%	8.0%
Hospital-substitute treatment	\$3.57	5.8%	-1.0%
General treatment ancillary Medical gap where gap was paid	\$60.27	3.3%	2.3%
	\$266.50	-0.6%	10.5%

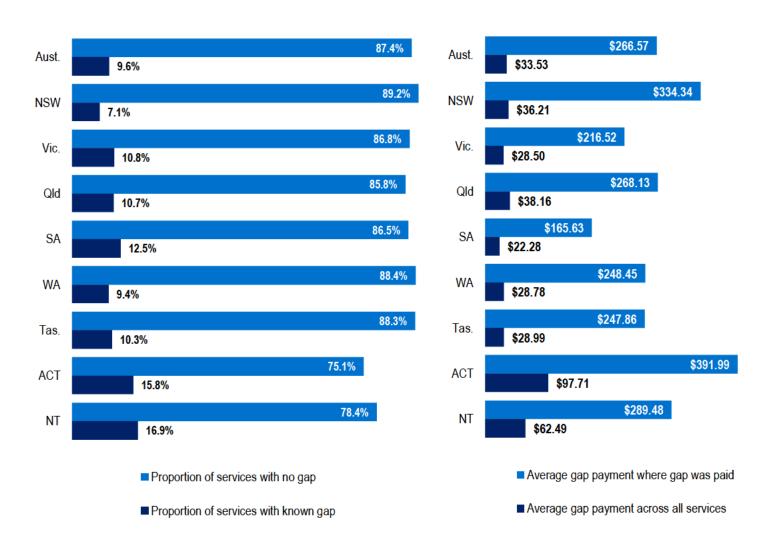

The average out-of-pocket (gap) payment for a hospital episode was \$432 in the Sepetmber 2024 quarter. This included out-of-pocket payments for medical services, in addition to any excess or co-payment amounts relating to hospital accommodation.

The out-of-pocket payments for hospital episodes increased by 8.0% compared to the same quarter for the previous year. Out-of-pocket payments for medical services were \$266.50 where an out-of-pocket payment was payable. The amount of gap for medical services varies depending on the specialty group. The specialty group with the largest out-of-pocket payment was Orthopaedic with an average gap of \$707.78. Gap incurred for the various medical services is displayed in the first chart. Medical gap also varies by state and territory and these differences are shown in the bottom chart.

Notes on statistics

Source of data

On 1 July 2015, supervisory responsibilities were transferred from the Private Health Insurance Administration Council (PHIAC) to APRA under the *Private Health Insurance (Prudential Supervision) Act 2015*.

This publication is compiled primarily from regulatory returns submitted to APRA under the *Financial Sector (Collection of Data) Act 2001* by authorised Private Health Insurance companies.

Prior to 1 July 2015, PHIAC collected data from Private Health Insurers.

The population figures used to calculate coverage are derived from:

Australian Bureau of Statistics, Australian Demographic Statistics, ABS cat no. 3101.0, ABS, Canberra.

The June 2019 quarterly release of *Australian Demographic Statistics* contains the most recent estimates of the resident populations (ERP) of Australia and the states and territories based on the results of the 2019 Census of Population and Housing held on 9 August 2016. For more information refer to the publication at the ABS website.

Net change by five year age group is the actual change adjusted for the number of people moving into the cohort and out of the cohort due to ageing. The calculation makes the simplifying assumption that the number of people are evenly distributed over each year within the five year age group.

Lifetime Health Cover is a financial loading (LHC loading) that can be payable in addition to the premium for your private health insurance hospital cover (hospital cover). LHC loadings apply only to hospital cover. The loading is 2% above the base rate for each year over the age of 30 in which the policy holder did not have private health insurance hospital cover. After ten years of paying the loading is removed.

Starting from 1 April 2007, general treatment policies replaced ancillary policies. General treatment policies cover treatment similar to that previously known as ancillary (eg. dental) but can also cover hospital-substitute treatment and Chronic Disease Management Programs.

"APRA replacing any references to the terms prosthesis, prostheses and prosthetic with medical device/s or human tissue product/s effective from 31 March 2024, to ensure consistency between the terminology used in the updated PHI legislation and APRA reporting standards below.

Related Publications

Quarterly publications

A number of related quarterly publications are available from:

https://www.apra.gov.au/publications

These include:

Quarterly Statistics

The Quarterly Statistics are principal release of statistics with summaries for the key financial and membership statistics of the Private Health Insurance industry.

Membership Statistics

A publication which details by State the number of insured persons for hospital treatment and general treatment and the proportion of the population these persons represent. The tables are shown on both a quarterly and an annual basis and include hospital treatment by age cohort.

Medical Gap Information

A publication on in-hospital medical services. The proportion of services for which there was no gap or known gap and the average gap payment are shown for each state.

Private Health Insurance Membership and Benefits (formerly PHIAC A)

A publication detailing by State, the membership and benefits paid by private health insurers for the period. These State reports are available both in PDF format and Excel.

Prostheses Report

A report providing data on prosthetic benefits paid by private health insurers by major prosthetic category

Medical Services Report

A report providing data on services, benefits paid and gap payments by MBS Specialty Block Groupings for medical services paid by private health insurers.

Statistical Trends - Quarterly Statistical trends in membership and benefits paid

These are two separate publications detailing trends since September 1997 in the number of insured persons and benefits paid for hospital and general treatment.

Annual publications

APRA will continue to produce an Annual Report on the Operations of the Private Health Insurance Industry. This report contains an industry overview and tables of statistics by individual fund. Current and historical versions are available at:

https://www.apra.gov.au/publications/operations-private-health-insurers-annual-report
