Disclaimer

While APRA endeavours to ensure the quality of this Publication, APRA does not accept any responsibility for the accuracy, completeness or currency of the material included in this Publication, and will not be liable for any loss or damage arising out of any use of, or reliance on, this Publication.

Forthcoming issues

This publication will be released according to the timetable published on the APRA website.

Revisions

This edition of the publication contains revisions to previously published statistics. Significant revisions, if any, are identified and quantified in the 'Important notice'.

This publication will include revisions to previously published statistics if better source data becomes available or if compilation errors are uncovered.

APRA regularly analyses past revisions to identify potential improvements to the source data and statistical compilation techniques, in order to minimise the frequency and scale of any future revisions.

Notation

Amounts are expressed in Australian dollars.

The symbol ' * ' indicates that the data have been masked to maintain confidentiality.

Rounding

Details on tables may not add up to totals due to rounding of figures.

Glossary and explanatory notes

A set of explanatory notes and glossary are provided at the end of the publication to assist the reader in understanding the source and definitions of the data.

Important notice

The *Life Insurance Supplementary Statistical Tables (LISST)* uses annual accounts that correspond to insurers' own financial years and the data in this publication are based on a mix of annual returns from different periods. It includes information about insurers' sources of profit, assets backing policy liabilities and policy liabilities. These data were previously published in the *Half Yearly Life Insurance Bulletin*.

For the industry's aggregate data, such as financial performance, product group performance and financial position, which were previously published in the *Half Yearly Life Insurance Bulletin*, please refer to the *Quarterly Life Insurance Performance Statistics* publication.

This publication is available in three versions: an Adobe PDF version for printing, a Microsoft Excel version, and a database version (in a Microsoft Excel file) which contains a full time series of statistics that are published in the PDF and Excel versions back to 2008. The database version also contains additional product level information.

The data in this Publication are based on a mix of annual returns from different periods.

This publication will be released once a year according to the timetable published on the APRA website.

Highlights

The highlights section will summarise key statistics contained in the publication.

Table 1 Sources of profit - total statutory funds

Financial years ended in the 12 months to June 2013

(\$ million)

	Class of business		Type of fund		Total statutory funds
	Superannuation	Ordinary	Investment linked	Non investment linked	
Investment earnings on assets in excess of policy liabilities	9,999	9,999	9,999	9,999	9,999
Profit margins emerging	9,999	9,999	9,999	9,999	9,999
Acquisition expenses	9,999	9,999	9,999	9,999	9,999
Maintenance expenses	9,999	9,999	9,999	9,999	9,999
Mortality (net of reinsurance)	9,999	9,999	9,999	9,999	9,999
Morbidity (net of reinsurance)	9,999	9,999	9,999	9,999	9,999
Surrender & discontinuances	9,999	9,999	9,999	9,999	9,999
Investment profits from current year earnings	9,999	9,999	9,999	9,999	9,999
Investment profits from change in assumed future net earned rates	9,999	9,999	9,999	9,999	9,999
Tax differences	9,999	9,999	9,999	9,999	9,999
Other items	9,999	9,999	9,999	9,999	9,999
Total experience profit or loss	9,999	9,999	9,999	9,999	9,999
New business losses recognised	9,999	9,999	9,999	9,999	9,999
Loss recognition/ reversal in respect of inforce business	9,999	9,999	9,999	9,999	9,999
Total capitalisation of loss / reversal of capitalised loss	9,999	9,999	9,999	9,999	9,999
Financial instrument profit	9,999	9,999	9,999	9,999	9,999
Management services profit	9,999	9,999	9,999	9,999	9,999
Change in valuation methods and assumptions	9,999	9,999	9,999	9,999	9,999
Total Life Insurance Act operating profit after income tax	9,999	9,999	9,999	9,999	9,999
Cumulative losses carried forward at the end of the year	9,999	9,999	9,999	9,999	9,999
Number of entities	9,999	9,999	9,999	9,999	9,999
Number of statutory funds	9,999	9,999	9,999	9,999	9,999

A list of additional statistics only available in the database version can be found on page 16.

Table 2a Assets backing policy liabilities - total statutory funds

Financial years ended in the 12 months to June 2013

A list of additional statistics only available in the database version can be found on page 16.

Explanatory notes

Introduction

The publication uses annual accounts that correspond to insurers' own financial years and the data in this publication are based on a mix of annual returns from different periods. It includes information about insurers' sources of profit, assets backing policy liabilities and policy liabilities. These data were previously published in the Half Yearly Life Insurance Bulletin.

The database version of this publication includes a full time series of statistics that are published in the PDF and Excel versions, and also contains additional data items including income statement and financial position data, and product level information.

Source of data

This publication is compiled primarily from regulatory returns submitted to APRA under the *Financial Sector (Collection of Data) Act 2001* by authorised life insurance companies. APRA-regulated life insurers are prudentially supervised under the *Life Insurance Act 1995*.

Blank copies of the returns and associated instructions are available on the APRA website.

Basis of preparation

The information contained in this publication is not directly comparable to APRA's previous publication *Life Insurance Trends (Trends)* due to the change in prudential reporting framework that took effect on 1 January 2008.

Figures in this publication are prepared from the individual authorised insurer accounts, not consolidated insurance group accounts. Transactions between related entities within the same insurance group have not been eliminated. Examples of such transactions include loans between parents and subsidiaries.

Figures represent the total operations of Australian authorised insurers, not only business undertaken within Australia.

Total statutory funds data

Type of fund - investment linked and non investment linked business may not add up to the total statutory funds figures due to statutory fund eliminations.

Class of business - ordinary business includes Australian ordinary business and overseas business. Superannuation and ordinary business may not add up to the total statutory funds figures due to statutory fund eliminations.

Glossary

Definitions

Average total asset and net asset items (if used) are the average of the opening and closing balances of the relevant item over the period.

Debt securities comprises interest bearing securities and loans.

Effective movement in net policy liabilities is calculated as *movement in net policy liabilities* less deposits received, plus withdrawals of deposits, plus non-premium related fees for management services, plus movements in the liability for deferred fee revenue, less movements in the liability for deferred acquisition costs.

Net policy expenses is policy expenses net of outward reinsurance claims.

Net policy revenue is policy revenue net of outward reinsurance premiums.

Number of entities is the number of registered life insurers where data is provided at the investment linked, non investment linked, total statutory funds, total shareholders' funds or total entity level. Where data is provided at the product or class of business level the number of entities is those life insurers who reported non zero figures for the reference period. For table 2, the number of entities for the 'other' product group reflects the total number of entities included in the table.

Number of statutory funds is the number of registered statutory funds where data is provided at the investment linked, non investment linked, total statutory funds, total shareholders' funds or total entity level. Where data is provided at the product or class of business level the number of statutory funds is those funds who reported non zero figures for the reference period. For table 2, the number of statutory funds for the 'other' product group reflects the total number of funds included in the table.

Other assets (table 2) comprises receivables, gross policy liabilities ceded under reinsurance, deferred tax assets, other non-investment assets, assets with non-standard resilience factors and assets with no resilience requirement.

Other liabilities (table 2) comprises any other liabilities excluding borrowings and tax liabilities.

Other product group (table 2) comprises L.10 Other .

Return on net assets is net profit/loss after tax divided by the average net assets for the period. This is expressed as annual percentage rates. For quarterly returns, this is achieved by multiplying the calculated *return on net assets* by 4. For returns covering the financial/calendar years, this is calculated by using the full year income/profit and average asset figures.

List of the additional statistics only available in the database version of the supplementary statistics

Sources of profit			
total statutory funds, investment linked, non investment linked, superannuation business & ordinary business			
Statistic	Current publication version	Proposed version (where changed)	New statistics published from:
